

Joint organizers:

The Second International Conference on Utility Management and Safety 7 – 8 March 2011. Hong Kong Call for Conference Papers

Background and Objectives

The purpose of the proposed International Conference is to provide an unique and excellent platform for utility specialists to share experiences and deliver new theory/opinions, educate practitioners in the industry about utility protection, and to enhance utility management and safety among the practitioners.

It is hoped that ICUMAS.2011 could help industry practitioners not just to have an insight and share more about utility management, but also to keep abreast of new developments of utility and pipe technology all over the world, as well as to universally network with each other for further cooperation and potential opportunities.

Conference Topics

Theme: Towards Sustainable Urban Development

The major topics for the conference program are as follows:

Field Techniques & Materials: Utility Surveys, Pipe Condition Surveys, Pipe Rehabilitation Methods and Materials, Water Leakage Detection, etc.

Asset & Data Management: Project Management, Training, Personnel, System, Program, Construction Design, GIS, Data Sharing, etc.

Safety & Health: Damages, Pollution, carbon reduction etc.

The above topics are not exhaustive and papers which fall within the general theme of the conference will be considered for presentation. Conference proceedings will be published and made available at the conference. An abstract (maximum of 250 words) should be sent to the conference secretariat no later than 31 March 2010. The Technical Review Board members would review the collected abstracts. Papers will be accepted on the basis that the named author will attend the Conference in person to make the presentation.

The conference official language is English. Putonghua speaking speakers are welcome provided that the presentation power-points are prepared in English.
